WHEREAS, the Order specifies to the Statewide General Waste Discharge Requirements for sanitary sewer systems to: (1) reduce the frequency and volume of sanitary sewer overflows, (2) improve the condition of the City's municipal sanitary sewer infrastructure and, (3) protects the environment and natural resources; and

WHEREAS, the City is required to develop and implement a system-specific Sewer System Management Plan ("SSMP") in accordance with the terms of the Order because the City owns and operates a sanitary sewer system greater than one mile in length that collects and conveys untreated and partially treated wastewater to a publicly owned treatment facility in the State of California; and

WHEREAS, on May 16, 2009, the South Gate City Council approved a comprehensive SSMP as required by the Order including the required provisions to provide proper and efficient management, operation and maintenance of the City's sanitary sewer system, while taking into consideration risk management and cost benefit analysis; and

WHEREAS, said SSMP contains a spill response plan that establishes standard procedures for immediate response to sanitary sewer overflows in a manner designed to minimize water quality impacts and potential nuisance conditions; and

WHEREAS, State regulations require that the SSMP be recertified after five (5) years from the date of the initial certification and when significant changes occur, as has been the case in South Gate;
