South Gate Park is a great place to run or walk for exercise or just enjoyment. To make your experience as safe and pleasant as possible, we hope that you’ll follow these simple tips.

- **Stay on the Paths!** The paths are safer & better lit than running on the sidewalks. Please refer to the map below for path routes.

- **Do not run in the street** - It is both dangerous and illegal to run in the street. Particularly around a busy area such as South Gate Park. Drivers are often preoccupied or unable to see a runner in the street.

- **Walkers & slower runners** - keep to the outskirt of the path. Faster, more experienced runners should stay towards the middle and pass to the left of the other runner.

- **Do not run besides the paths!** Sprinkler heads, tree roots, light poles are only some of the many obstacles that exist along the way. Avoid these hazards by staying on the path.

- **Don’t become so focused on your workout that you loose sight of those around you.** It can lead to accidents.
